COACH RESOURCE LIBRARY

HOW TO USE THIS LIBRARY

This is the download pack for Kocha Mwenzangu coaches. It has a study card for every online class, short videos to watch, and quick-reference cards you can print and take to practice. You do not need to read it all at once: use the card for the week, watch one video, and try one thing with your team.

IF YOU HAVE...	DO THIS
5 minutes	Read the one-sentence summary and the key ideas on this week's card.
15 minutes	Also watch one video from the Watch list.
30 minutes	Do all of the above, then try the 'Try it this week' task with your team.

LOW DATA TIPS

- Download videos on Wi-Fi first. In the YouTube app, tap Download, or ask a friend with data to share the video on WhatsApp.
- Set quality to 360p or 480p to save data.
- Slides and recordings for every class are on the AMSC WhatsApp group.
- Videos are from other creators and are for learning only. They show ideas, not rules. If a video disagrees with AMSC's advice for your athletes, follow AMSC and ask in class.

> **ABOUT THE VIDEOS**
> Videos are made by outside coaches and clinics, often in other countries. Foods, equipment and facilities may look different from yours. Take the principle, then adapt it with what you have.

SESSION MAP

#	CLASS
1	Welcome, tools, baseline habit
2	Reading your baseline
3	Movement and injury risk
4	Warm-up, mobility and load
5	Energy systems
6	Strength programming and cues
7	Fueling and hydration
8	Recovery nutrition and sleep
9	Skills Camp preparation
10	Troubleshooting and reinforcement
11	Taper and competition readiness
12	Reflect

PART B

STUDY CARDS

SESSION 1: WELCOME, TOOLS AND THE BASELINE HABIT

> **One sentence:** We measure to start from the truth.

KEY IDEAS

- A baseline is a starting line, not a grade. Compare each athlete with themselves.
- Results are private: only the athlete and their coach see them.
- Session RPE: ask 'How hard was the whole session?' (0 to 10) about 30 minutes later. Load = RPE x minutes.
- Readiness check: five questions before training. Green go, amber modify, red sit out.
- Pain, dizziness or illness means stop. Nobody is pushed through it.

WORDS TO KNOW

TERM	MEANING
Baseline	Your starting numbers, taken before training changes anything.
RPE	Rating of perceived exertion: how hard something felt, 0 to 10.
Load	RPE multiplied by minutes. A simple measure of how big a session was.
Readiness	How ready an athlete is today to train.

Watch: A short AMSC video for this session will be added to the resource page.

TRY IT THIS WEEK

- After your next team session, ask each athlete for their RPE and write it down with the minutes.
- Use the five readiness questions at the start of one session.

> THINK ABOUT IT
> Who on your team might rate every session 8 or 9? Who might always say 3? What does that tell you about how to ask the question?

SESSION 2: READING YOUR BASELINE

> **One sentence:** Compare athletes to themselves.

KEY IDEAS

- Each test shows one thing: jumps for power, 20 m sprint for speed, 5-10-5 for changing direction, push-ups and plank for strength endurance, squat snapshot for movement quality.
- Numbers move with sleep, effort, surface and growth. Hand timing has an error of about 0.1 to 0.2 seconds.
- Look at the team for the biggest gap, then at each athlete for one thing to coach.
- Never rank athletes in front of others and never label them.

WORDS TO KNOW

TERM	MEANING
Power	How fast you can produce force. A jump is a power test.
Acceleration	How quickly you speed up from standing.

TERM	MEANING
Change of direction	How well you stop, turn and go again.
Snapshot	A quick look at how someone moves, rated G, A or R.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
Vertical Jump Assessment: No Equipment Needed https://www.youtube.com/watch?v=IBC00PJ28uk	Brian Nevison	2:31	Test jump height with a wall and chalk and get a repeatable number. Matches our jump-and-reach method.
Standing Broad Jump Test Procedures https://www.youtube.com/watch?v=cg_NASdYh-8	Red Gorilla Strength	n/a	How to run the standing broad jump with only a tape measure. Older video; the method is unchanged.
5-10-5 Agility Test https://www.youtube.com/watch?v=BPkFvPySDe0	Travis Goyeneche	0:43	A quick look at the 5-10-5 run we use for change of direction.
How to Properly Run the Pro Agility (5-10-5) https://www.youtube.com/watch?v=qYDXaXRodWc	SKLZ	n/a	Set-up and technique for the 5-10-5 (also called the pro agility drill).

TRY IT THIS WEEK

- Choose one athlete and write two sentences: what is their strongest area and what will you coach first?
- Run the wall jump test yourself and check you get a similar number twice.

> THINK ABOUT IT
> If an athlete is slow in the sprint but jumps well, what might you check first: strength, landing or technique?

SESSION 3: MOVEMENT AND INJURY RISK

> **One sentence:** Move well first; load comes second.

KEY IDEAS

- The ankle is the most commonly injured joint in basketball; knee and back injuries are also common.
- Most injuries come from too much too soon, poor landing and movement habits, tiredness and a previous injury.
- Good landing is quiet, soft and balanced for 2 seconds with knees over toes.
- Persistent pain, swelling, locking, numbness or a head knock: stop and refer. Coaches notice, protect and refer; they do not diagnose.

WORDS TO KNOW

TERM	MEANING
Landing	How the athlete absorbs force after a jump.
Knee valgus	The knee caving inward during a squat or landing.
Red flag	A sign that needs a professional.
Prevention	Habits that lower injury risk.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
ACL Injury Prevention: Jumping and Landing Technique https://www.youtube.com/watch?v=ICxMeAhj8A0	Hospital for Special Surgery	2:56	Made for coaches: build jumping and landing technique into warm-ups to reduce injury risk.
Jump technique: How to land safely https://www.youtube.com/watch?v=5YUk2h0Jit4	Shoot The Shot	2:14	Short basketball-context demonstration of landing softly and safely.
The Lunge Stop: Essential Basketball Deceleration Technique https://www.youtube.com/watch?v=RA58o7clADA	Lee Taft	n/a	How to stop and set up the next move: the lunge stop compared with the jump stop.
Jump Training For Young Athletes | Plyometric Training For Youth Athletes https://www.youtube.com/watch?v=QjbKVi0VJDU	PowerLux Fitness	11:58	A youth jump-training session with carefully progressed jumps. Use as ideas; keep volume low and landings clean.

TRY IT THIS WEEK

- Ask two athletes to step off a low box and stick the landing. Write one fix for each.
- Teach one landing cue to your whole team: 'land like a cat'.

> **THINK ABOUT IT**
> Which injury has happened most often on your court, and what habit might have caused it?

SESSION 4: WARM-UP, MOBILITY AND LOAD

> **One sentence:** Prepare the body, then manage the load.

KEY IDEAS

- RAMP: Raise (easy movement), Activate (wake up muscles), Mobilise (take joints through range), Potentiate (short, sharp efforts).
- Dynamic moves before play, static stretches after.
- Weekly load is the sum of session loads. Raise it gradually; a big jump from one week to the next is a warning sign.
- Plan easy days after hard days and an easier week after two or three hard weeks.

WORDS TO KNOW

TERM	MEANING
RAMP	Raise, Activate, Mobilise, Potentiate: a four-step warm-up.
Dynamic	Moving stretches. Used before training.
Weekly load	Total of RPE x minutes for the week.
Spike	A sudden big jump in load.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
RAMP Warm Up for training and competing https://www.youtube.com/watch?v=cZTbMLgolUk	Muscle Therapies	n/a	A simple full-body warm-up that follows the raise-activate-mobilise-potentiate idea.

WATCH	CHANNEL	LENGTH	WHY WATCH IT
Dynamic Warmup and Stretches for Basketball Players (Practice & Games) https://www.youtube.com/watch?v=wX9RmYxL2W8	BBall IQ	n/a	A dynamic warm-up made for basketball practices and games.
How to do the FIFA 11+ Warm-Up/Injury Prevention Program https://www.youtube.com/watch?v=nYNutt5_nFE	National Soccer Coaches Association of Canada	n/a	Shows the running phase of a research-backed injury-prevention warm-up. Soccer example; the idea transfers to basketball.
Hip Mobility For Athletes (Follow Along Routine) https://www.youtube.com/watch?v=CQpKWLmeZ4Q	Strength Side	12:38	Follow-along hip mobility drills. Go slowly and stop at any pain.

TRY IT THIS WEEK

- Lead a 15-minute RAMP warm-up with your team and time it.
- Add up the week's loads for three athletes.

> **THINK ABOUT IT**
> In your usual warm-up, which of the four RAMP parts is missing?

SESSION 5: ENERGY SYSTEMS

> **One sentence:** Train the system the game uses.

KEY IDEAS

- Three systems work together: phosphagen (very short, explosive), glycolytic (high effort lasting seconds to about 2 minutes), aerobic (long, steady, helps recovery).
- Basketball is repeated short sprints with brief rests, so conditioning should look like that.
- Aerobic fitness helps athletes recover between bursts.
- Dose conditioning with RPE and minutes. Build gradually and watch heat and hydration.

WORDS TO KNOW

TERM	MEANING
Phosphagen	The energy system for the first few seconds of an all-out effort.
Glycolytic	Used for hard efforts that last longer, up to a couple of minutes.
Aerobic	The steady system that uses oxygen.
Work:rest	Time working compared with time resting, e.g. 15 seconds on, 15 off.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
Learn the 3 Energy Systems! ATP-PC, Lactic Acid & Aerobic https://www.youtube.com/watch?v=PIrhiSJcapc	PE Buddy	n/a	A clear beginner explanation of the three energy systems and how they work together.
5 Basketball Conditioning Drills For Youth https://www.youtube.com/watch?v=Ey5fCDxuIK4	Basketball Coach Allen	n/a	Five court-based conditioning drills for young players. Check the volume against your team's RPE.

WATCH	CHANNEL	LENGTH	WHY WATCH IT
Change Of Direction Acceleration And Deceleration For Basketball https://www.youtube.com/watch?v=cMBmLCBJ8fo	Seth Thomas	5:32	Drills for accelerating, decelerating and changing direction in basketball.
ENERGY SYSTEMS: Strength & Conditioning Essentials https://www.youtube.com/watch?v=u_JGzA0Y6Gw	PowerTraining	31:38	Optional deep dive. Longer and more technical.

TRY IT THIS WEEK

- Design an 8-minute conditioning block for your team and run it once. Record RPE.
- Replace one jogging lap with a short court-based interval.

> **THINK ABOUT IT**
> In your last game, how long was the longest all-out effort? How long was the rest?

SESSION 6: STRENGTH PROGRAMMING AND COACHING CUES

> **One sentence:** Simple patterns, progressed carefully.

KEY IDEAS

- Six patterns: squat, hinge, lunge, push, pull, carry (plus core).
- Start with bodyweight; 2 to 3 sets of 6 to 12 reps; stop 1 to 2 reps before failure.
- Under 18: technique first, no maximal lifts.
- One cue at a time, short and positive. Show, cue, correct, check, celebrate.
- Progress only when two sessions look clean.

WORDS TO KNOW

TERM	MEANING
Progression	A harder version of an exercise.
Regression	An easier version of an exercise.
Cue	A short instruction that helps an athlete fix one thing.
Hinge	Bending at the hips while keeping the back flat.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
The Truth About Strength Training for Kids https://www.youtube.com/watch?v=UXZZzGL8xxg	Emerge Pediatric Therapy	n/a	A physical therapist addresses myths: is it safe and does it stunt growth?
How To Coach And Perform The Goblet Squat! https://www.youtube.com/watch?v=mCMyPPmO6tA	ONEighty Athletics	n/a	Coaching cues for the goblet squat with an athlete demonstrating.
How To Do A Goblet Squat Correctly https://www.youtube.com/watch?v=JO7D6GJ98wY	Jack Hanrahan Fitness	11:13	Goblet squat form, depth, rib position and modifications.

WATCH	CHANNEL	LENGTH	WHY WATCH IT
How to Hip Hinge (for Beginners) https://www.youtube.com/watch?v=Dn3GexXx228	Dr. Carl Baird	n/a	Teaches the hip hinge and common beginner mistakes.
Hip hinge / bodyweight deadlift: a fundamental movement for athletes https://www.youtube.com/watch?v=068DbYEpKio	Lift Clinic	n/a	Shows the hinge as a bodyweight deadlift: hips back, torso steady, then drive the hips forward.
How to Get Your First 10 Push Ups (Beginner Guide From Zero) https://www.youtube.com/watch?v=N4TVYoXKk-8	Cara Kuykens	n/a	Step-by-step push-up progression for beginners, with wrist-friendly options.
How to do Push Ups for Beginners with Progression https://www.youtube.com/watch?v=m5DMu0PiksU	Bodybuilding.com (Barstarzz)	n/a	Correct push-up form, common errors and easier versions.
How to do the perfect SPLIT SQUAT: technique and common mistakes https://www.youtube.com/watch?v=la0pLPg-3A8	Get Exercise Confident	n/a	Split squat technique and the most common mistakes. Older video.
Train Like an Athlete: 5 Single Leg Exercises for Strength & Balance https://www.youtube.com/watch?v=IBUwgLEKeUc	Jason and Lauren	about 15 min	Five single-leg exercises. Start with the easy ones; some are advanced for beginners.
Single-Leg RDL (Bodyweight) https://www.youtube.com/watch?v=y4SxoMHlnr0	Train With Cuz	n/a	Bodyweight single-leg hinge: keep hips level and control balance.
Inverted Rows (Beginner to Advanced Progressions) https://www.youtube.com/watch?v=FI0UMfdEzsE	Zack Henderson	n/a	Row form and easier-to-harder versions. Needs a low bar or sturdy table.
How To Do a Row at Home (no equipment required) https://www.youtube.com/watch?v=hfGD-K11vPk	Stronger Runner	1:55	A row using a bedsheet and a door. Test it carefully; only use a strong door.
How to Do a Dead Bug | Core Stability Exercise for Beginners https://www.youtube.com/watch?v=pxqI0kTdmEs	Alex McBrairty	n/a	Dead bug: core bracing, common errors and easier variations.
Core Exercises - Bird Dog, Dead Bug, and Side Plank https://www.youtube.com/watch?v=T1h8n4YMonY	Foster Family Chiropractic & Associates	n/a	Three simple core-stability exercises, with a side plank.
How to Perform the Farmer's Carry https://www.youtube.com/watch?v=z7E_YU9P1jU	Dr. Carl Baird	n/a	How to do a loaded carry. Any two equal heavy objects (jerrycans, bags) will work.
Attentional Focus Explained - Coach Education https://www.youtube.com/watch?v=py6VzbrSJ30	Golf Coach: Dr. Noel	n/a	Why cues about the effect of the movement often work better than cues about body parts. Golf example; the idea transfers.

TRY IT THIS WEEK

- Run a 30-minute strength session with one exercise per pattern.

- Practise saying a cue in 6 words or fewer.

> THINK ABOUT IT
> Which of your athletes cannot do a clean push-up yet? What easier version could they start with?

SESSION 7: FUELING AND HYDRATION [SCOPE PENDING]

> **One sentence:** Food first, water always.

KEY IDEAS

- A simple plate: about half vegetables and fruit, a quarter carbohydrates, a quarter protein.
- Eat the main meal 3 to 4 hours before a game; a small carbohydrate snack about an hour before; nothing new on game day.
- Drink through the day. Pale straw urine is a simple check.
- No supplements or energy drinks for young athletes.

WORDS TO KNOW

TERM	MEANING
Carbohydrate	Main fuel for hard efforts: ugali, rice, potatoes, bread.
Protein	For building and repairing: eggs, beans, fish, chicken, milk.
Hydration	Having enough fluid in the body.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
Nutrition for Young Athletes https://www.youtube.com/watch?v=fjrAVpeYPJc	KSTP 5 Eyewitness News	n/a	A short interview on how food choices keep young athletes energised. Uses US foods; adapt to local foods.
Help for When It's Hot: Hydration #HeatHacks for Athletes https://www.youtube.com/watch?v=w98CSdn_qXA	MultCoPresents	n/a	Hydration before activity and the signs of heat illness. Short, public-health style.

TRY IT THIS WEEK

- Write what a good day of eating looks like for one athlete using foods they can afford.
- Check water availability at your next practice.

> THINK ABOUT IT
> What do your athletes usually eat before a game, and what would you change first?

SESSION 8: RECOVERY NUTRITION AND SLEEP [SCOPE PENDING]

> **One sentence:** Recovery is where adaptation happens.

KEY IDEAS

- Within 1 to 2 hours after training, eat a meal or snack with carbohydrate and protein.
- Teenagers need roughly 8 to 10 hours of sleep. Protect it around games and exams.
- You do not need special shakes or powders.
- Skipping meals does not make athletes lighter or faster. Refer medical and eating concerns to a professional.

WORDS TO KNOW

TERM	MEANING
Recovery	The time and habits that let the body adapt to training.
Sleep routine	Same sleep and wake times, screens off before bed.

WATCH

WATCH	CHANNEL	LENGTH	WHY WATCH IT
How To Improve Sleep For High School Athletes https://www.youtube.com/watch?v=o2TkfNylcGo	Feldman Physical Therapy and Performance	5:01	Sleep habits for teen athletes, including building rest across the days before a game.

TRY IT THIS WEEK

- Ask your athletes how many hours they slept last night. Look for a pattern.
- Agree one after-training snack your team can afford.

> **THINK ABOUT IT**
> What gets in the way of sleep for your athletes: school, travel, phones, noise?

SESSIONS 9 TO 12 (CARDS ISSUED AS THE SESSIONS NEAR)

SESSION	TOPIC	FOCUS
9	Skills Camp preparation	Plan and lead a 10-minute station: aim, drills, cues, safety.
10	Troubleshooting and reinforcement	Bring your problems; review progress and next steps.
11	Taper and competition readiness	Game-day routine, fueling, rest between games, and how to run the re-test.
12	Reflect	Compare baseline and re-test; plan the next 12 weeks.

SESSION 10 VIDEO	CHANNEL	WHY WATCH IT
Functional Testing - Return to Sports https://www.youtube.com/watch?v=Q02HZOMEEt0	Scottish Rite for Children	How a youth sports-medicine team decides when it is safe to return after injury.

PART C · PRINT AND TAKE TO PRACTICE

QUICK-REFERENCE CARDS

C.1 SESSION RPE

RATING	MEANING	FEELS LIKE
0–1	Rest / very easy	Walking, stretching
2–3	Easy	Easy jog; you can chat
4–5	Moderate	Short sentences only
6–7	Hard	Heavy breathing; tough but fine
8–9	Very hard	A few words at most
10	Maximal	The hardest you could go

Load = RPE x minutes. Example: RPE 6 for 90 minutes = 540. Ask 30 minutes after the session; ask privately.

C.2 READINESS CHECK

ASK	IF YES
1. Any pain or injury today?	RED: sit out of hard work and help in another way.
2. Feeling sick, dizzy or very tired?	RED: sit out of hard work.
3. Slept under 6 hours?	AMBER: train, no maximal efforts.
4. Eaten and had water in the last 3 hours?	If no: AMBER. Give water and a snack first.
5. Anything we should know?	Listen, then decide.

C.3 RAMP WARM-UP (15 MINUTES)

PHASE	TIME	EXAMPLES
Raise	3 min	Easy jog, side shuffles, skips, arm circles
Activate	5 min	Glute bridges, bodyweight squats, hip circles, ankle rocks, scapular push-ups
Mobilise	2 min	Lunge with reach, lateral lunge, inchworm
Potentiate	5 min	Two small jumps, two build-up sprints over 10 m, one stick-the-landing

C.4 LANDING CUES

- Land quietly. Loud means stiff.
- Soft knees; hips go back.
- Knees stay over the toes, not caving in.
- Balance for 2 seconds before moving.
- Land on two feet before one.

C.5 PLATE AND HYDRATION

PLATE	EXAMPLES
Half: vegetables and fruit	Sukuma wiki, cabbage, spinach, tomatoes, bananas, oranges
Quarter: carbohydrate	Ugali, rice, chapati, potatoes, githeri

PLATE	EXAMPLES
Quarter: protein	Eggs, beans, fish, omena, chicken, milk, lentils

Hydration check: pale straw-coloured urine = good. Dark yellow = drink more. No supplements or energy drinks for young athletes.

C.6 STOP RULES

- Stop for sharp pain, dizziness, chest pain, trouble breathing or nausea.
- Sit, hydrate, tell a coach.
- Head knock: remove from play and refer. Never the same day.
- Pain lasting more than 2 to 3 days, swelling, locking or numbness: refer.

C.7 MOVEMENT PATTERN VIDEO GUIDE

Use these to learn each pattern before you teach it. Watch one video per pattern; practise it yourself first. Several are for adults or older athletes, so use them to learn the technique, then coach it with your athletes using bodyweight and easy versions.

PATTERN	WATCH	CHANNEL
Squat	**How To Coach And Perform The Goblet Squat!** https://www.youtube.com/watch?v=mCMyPPmO6tA **How To Do A Goblet Squat Correctly** https://www.youtube.com/watch?v=JO7D6GJ98wY	ONEighty Athletics Jack Hanrahan Fitness
Hip hinge	**How to Hip Hinge (for Beginners)** https://www.youtube.com/watch?v=Dn3GexXx228 **Hip hinge / bodyweight deadlift: a fundamental movement for athletes** https://www.youtube.com/watch?v=068DbYEpKio	Dr. Carl Baird Lift Clinic
Lunge and split squat	**How to do the perfect SPLIT SQUAT: technique and common mistakes** https://www.youtube.com/watch?v=la0pLPq-3A8	Get Exercise Confident

Warm-up	**RAMP Warm Up for training and competing** https://www.youtube.com/watch?v=cZTbMLgoIUk **Dynamic Warmup and Stretches for Basketball Players (Practice & Games)** https://www.youtube.com/watch?v=wX9RmYxL2W8 **How to do the FIFA 11+ Warm-Up/Injury Prevention Program** https://www.youtube.com/watch?v=nYNutt5_nFE	Muscle Therapies BBall IQ National Soccer Coaches Association of Canada

Hand-built progressions for each pattern, in order from easy to hard, are in Session 6 and at the onsite visits.

PART D

GLOSSARY

TERM	MEANING
Acceleration	Speeding up from slow or standing.
Aerobic	Energy system that uses oxygen; steady, long efforts.
Agility / change of direction	How quickly and smoothly you stop, turn and go.
Baseline	Your first measurement, used to see change later.
CMJ	Countermovement jump: dip down, then jump as high as possible.
Conditioning	Training that builds the ability to repeat efforts.
Load	How big a session is: RPE x minutes.
Mobility	Ability to move a joint through its range.
Potentiate	Short, sharp efforts at the end of a warm-up to prime the body.
Progression	A harder version of an exercise.
RAMP	Raise, Activate, Mobilise, Potentiate warm-up.
Readiness	How prepared an athlete is to train today.
Regression	An easier version of an exercise.
RPE	Rating of perceived exertion (0 to 10).
Taper	Reducing training before competition to arrive fresh.
Volume	The amount of training: sets, reps, minutes.

DISCLAIMER

Videos are for learning only and come from other creators. AMSC does not own them and does not control future changes. Before giving athletes anything, check it with a coach or health professional. Never copy a diet, supplement or weight plan from a video.
